Synergy Coverage Solutions Offers Dividend Program

Since the inception of Synergy Coverage Solutions we have offered workers compensation insurance to home health and hospice care facilities. We understand that this class of business requires a very specialized set of services which we are dedicated to providing. We have recently begun offering additional pay plans that help the home health and hospice care agencies to have more control over their cash flow. In an effort to remain competitive and offer this class of business even more options, we have partnered with one of our Excellent rated carriers, Builders Insurance Group, to offer a dividend program. Effective immediately, all North Carolina home health care and hospice agencies can be considered for our newly approved dividend plan. The plan will reward the policyholder for their attention to safety and keeping workers compensation costs down by paying a dividend when their loss ratio is within an acceptable range. This added product underscores our philosophy of rewarding our insureds for their hard work and commitment. Each dividend plan policyholder will of course receive invaluable services from Synergy Coverage Solutions which will enable the policyholder to maintain a good loss ratio resulting in a dividend payout.

Please talk with your underwriter about any North Carolina home health care or hospice agency that you would like considered for this program.
